

One of the most famous of the world's rivers is the
 Nile. It is the longest river in the world, stretching
 for over 6,000 miles. It flows through the heart of
 Africa, from the south to the north, where it empties
 into the Mediterranean Sea. The Nile is the source of
 life for the people of the Nile valley. It has been
 the cradle of civilization for thousands of years.
 The ancient Egyptians built their great pyramids
 along its banks. The Nile is also the source of
 the world's most famous bird, the Nile crocodile.
 The Nile is a great river, and it is the lifeblood
 of the Nile valley. It has been the source of
 life and civilization for thousands of years.
 The Nile is a great river, and it is the lifeblood
 of the Nile valley. It has been the source of
 life and civilization for thousands of years.
